

International Seminar on Stem Cells and Its Applications

27th June 2016

Organized by Department of Biotechnology

Report

Department of Biotechnology organized international seminar on stem cells and its applications on June 27, 2016. Seminar was presided over by Dr. Sr. Lilly Principal, St Joseph's college, Irinjalakuda. Lecture session was preceded with a welcome address by Dr. Viji Mary Varghese, Head of the Department. Departmental activities were inaugurated by the resource person Dr Andrew Hopkinson, Principal research fellow and research coordinator, Faculty of Medicine and Health Sciences, Nottingham. Lecture session focused on tissue engineering of eye lens and cornea and its future prospective. Various sectors focusing on ocular surface regenerative technologies, pre-clinical testing and clinical translation of regenerative therapies through to clinical realization and commercial exploitation were discussed. Ultimately seminar was concluded with vote of thanks by Dr. Kavitha O, Assistant professor, Department of Biotechnology.
